

## How I installed Jupyter lab

```
python3 -m venv $PWD/jupyter-env  
source $PWD/jupyter-env/bin/activate
```

```
pip install jupyterlab nbconvert playwright  
playwright install chromium
```

```
python -m nbconvert quiz4sol.ipynb --to webpdf
```

} Python virtual environment (optional)

← gets JupyterLab

adds browser for it (optional)

↗ use for printing from command line

## Start web app

```
jupyter-lab
```

Make sure to click File → Shutdown before closing the web browser to stop the Jupyter backend when finished.
